

Merlinus Anglicus Junior :
OR, THE
STARRY MESSENGER,
For the YEAR of our Redemption, 1755.
Being the Third after
Bissextile, or Leap Year
Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations.
 - II. The State of the Year deduced according to Art, from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
 - III. The Rising, Southing, and Setting of the Moon, and High-Water at *London Bridge*.
 - IV. Tables of the Rising, Southing, and Setting of the Seven Stars, and other Fixed Stars of Note : A perpetual Table of the Rising and Setting of the Sun, Beginning and Ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year, with many other Tables pertinent for such a Work, all accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of *Great-Britain* or *Ireland*. The like not Extant.
- 2

By HENRY COLEY, Student in the
Mathematicks and the *Cœlestial Science*.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordain'd. Psal. viii. 3.

LONDON: Printed by E. NUNNELEY, for
the COMPANY of STATIONERS.

A perpetual TABLE of Day-break, Twi- light, &c. in the Latitude of London.

8th Day, at 10 in the Morn. ☿ is with the ☾.

8th Day, at 11 at Nig. ♀ is with the ☾.

9th Day, at 4 in the After. ♂ is with the ☾.

14th Day, at 2 in the After. ♀ is with the ☾.

26th Day, at 7 in the Morn ♀ is with the ☾.

The Aspects which we have amongst the Planets in this Month are but few, and those not very significant; but the Effect of last Month's Configurations will sufficiently shew themselves about this time. The Drum and Trumpet, that Mulick of Mars, will be much in Use in the South East Parts of the world. The two Eclipses that happen this Month will transfer much of the Calamities of these Times into the Turkish Dominions, as also to Austria, Asia, Livonia, Georgia, Calabria, Portugal, &c.

APRIL hath XXX Days.

Left Quarter the 3d Day at 5 in the Afternoon.

First Quarter the 15th Day at 4 in the Afternoon.

First Quarter the 19th Day at 4 in the Afternoon:
Full Moon the 26th Day at 8 in the Afternoon:

the 26th Day at 8 in the Morning.

A TABLE of some principal fix'd Stars, with the Time they rise, south, and set, either before or after the seven Stars; as also their Colour, Magnitude, and meridian Altitude, by which they may be readily discover'd.

Co- lour.	Mag.	Alt.	Names of the Stars	Rise.		South.		Sets.	
				H.	M.	H.	M.	H.	M.
♂	1	53	Aldebaran, or Bull's Eye	1	a 34	0	a 48	0	b 0
♂ ♀	1	29	Left Foot of Orion	4	31	1	31	1	34
♂ ♀	2	36	Middle * in Orion's Belt	4	13	1	51	0	35
♂ ♀	1	45	Right Shoulder of Orion	3	23	2	8	0	8
♂ ♀	1	21	Sirius, the great Dog	6	51	3	1	0	48
♂	2	43	Procyon, the little Dog	5	33	3	53	2	a 7
♂ ♀	1	30	Heart of Hydra	8	39	5	41	2	44
♂ ♀	1	51	Regulus, Lion's Heart	7	26	6	21	5	16
♀	1	54	Deneb, the Lion's Tail	8	42	7	54	7	7
♀ ♀	1	28	Virgin's Spike	12	46	9	38	6	36
♂ ♀	1	58	Arcturus	10	47	10	30	10	12
♂	1	12	Antares, Scorpion's Heart	17	36	12	39	7	42
♂ ♀	2	46	Bright Star of the Vulture	17	38	16	3	9	b 27
♀ ♀	1	6	Fomahant	1	14	19	11	10	37
♂ ♀	2	65	Head of Andromeda	19	43	20	19	2	56

T H E brightest of the seven Stars is of the third Magnitude, and hath 61 Degrees of meridian Altitude, and in Colour participates of the *Moon* and *Mercury*.

2. The fix'd Stars all rise, south, and set about four Minutes sooner every Night, than they did the Night before. This consider'd, the exact Time of their rising, southing, and setting, for any intermediate Night, not herein noted, may be very easily deduced from this Table, by Inspection only.

To know the Time of the rising, southing, and setting of any Star in this Table, for any Day requir'd, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the seven Stars, on that Day, and you shall have your Desire; observing, that in this Table *a* stands for *after*, and *b* for *before*.

COLEY, 1755.

I. *The History of Earthquakes continued, and the remarkable Events that succeeded them.*

The Lord is the true God, he is the living God, and an everlasting King: At his Wrath the Earth shall tremble, and the Nations shall not be able to abide his Indignation.
Jeremiah x. 10.

THE Philosophers of all Ages have been of Opinion, that the great Revolutions which have happened in the Societies of Men have been preceded by extraordinary Events; such as Earthquakes, Signs in Heaven, and Prodigies on Earth: Of which I have, in my late annual Books, given a concise History of Matters of Fact, very well attested, which have been Presages of direful Events. And though it seems to me that Earthquakes have their natural Causes, and so have Famines, Pestilences, and Wars; yet all good Christians must acknowledge the primary Cause of every Calamity to be Almighty God blessed for ever, who is pleased to suffer such dreadful Visitations as a Sign of his Anger, and as a Punishment of the Sins of Mankind: And our blessed Saviour puts these among those Things which are to presage his Coming. Not that I believe all Earthquakes are Presages; but there are such Circumstances of Time and Place and concomitant Signs in some, that no Man, without Rashness, can deny but the Providence of God doth dispense them to strike the Minds of Men with Astonishment, and make them attentive to his Judgments. O! the Depth of the Riches of the Wisdom and Knowledge of God! How incomprehensible are thy Ways! If thou shewest thy Power against the Wickedness of Mankind in such formidable and portentous Prodigies and Omens of Nature, what shall it be in that last Day, wherein the Earth shall be destroyed by thy Wrath, and the Elements shall melt with fervent heat?

A. D. 1622, was a great Earthquake in *Italy*. The Shape of an Elephant was seen in the Air, and three Suns: Armies fighting, monstrous Births, Waters turned into Blood, unusual and impetuous Tempests which overthrew several Towns. At this Time began the third Civil War in *France*. The Prince of *Conde* is taken and shot to Death. The Earls of *Northumberland*

COLEY, 1755.

land and *Westmoreland* rebel. The Popish Clergy are expelled *Antwerp* by the People. The Emperor prohibiteth the Protestant Religion at *Atken*. The *Spaniards* invade *Ireland*, but are beaten thence. The *Turks* lose *Alba Regalis* and 60000 Men. The *Persians* invade *Babylon*, and kill 20000 Men. The King of *France* is slain. Nine hundred thousand *Moors* are expelled *Spain*. The *Hollanders* beat the *Spaniards* in the *South-Sea*. The *Tartars* invade *Podolia*: They burn four Cities and 400 Villages, and carry from thence a vast Booty. The *Jesuits* and *Papists* are expelled the *Netherlands*. Soon after an Earthquake happened in *England*, and a great fiery Beam was seen in the Air in *France*; six Suns in *Cornwall* at once, and five Moons in *Normandy*. A great Earthquake happened in *Italy* at the same Time, whereby in the City of *Severine* alone 10000 Souls were taken out of the World; and, in the Horror of such infinite Ruins and Sepulchres of so many Mortals, a great Bell, thrown out of the Steeple by the Earthquake, fell so fitly over a Child, that it inclosed him, and did him no Harm. This was succeeded by long and bloody Wars in those Countries, and which plainly presaged the ensuing Miseries and Desolations which happened there.

A. D. 1650, in the Counties of *Cumberland* and *Westmoreland*, was a general Earthquake, wherewith the People were so affrighted, that many forsook their Houses, which were so shaken, that they fell down. The same Year the Island of *Santorin*, at the Bottom of the Streights in the *Mediterranean Sea*, not far from *Candia*, had formidable Fires and Earthquakes, so that the Island was shook for fifteen Days together. This Island was formerly called *Thera*, but now *Santorin*, and started up out of the Sea: For *Bevorius*, out of *Pliny*, thus writes; " In the Year 726, a Vapour was seen to bubble forth out of a Chimney of Fire, between the Islands of *Theressa*, or *Santorin*, from the very Bottom of the Sea, which continued some Days, and the Fire and Smoak, growing thicker by Degrees, spread itself abroad with mighty Flames; and with great Force cast out large rocky Pumice-Stones, and great Heaps of other Matters, which it carried throughout all *Asia*, *Lesbos*, and *Abydos*, and the Sea-Coasts of *Macedonia*, so that the Surface of the Sea was covered with these Pumices: But, in the Middle of so great a Fire, there was an Island made from the Heaping-up of that Matter and joined to the Island

Island called the *Sacred*, which never was in Being before." About the Time of these direful Concussions, there appeared a splendid Comet, with retrograde Motion, for the Space of twenty-one Days: And the remarkable Events that followed were the Wars between *England* and *Holland*, *Denmark* and *Sweden*. Bloody Sea-Fights. The Sea and the Waves thereof roaring. Strange Alterations in *England*. Quakerism now began to infest the World. The Pope and the King of *Bohemia* died. The *Turks* fell upon *Germany*, making woeful Havock there. The cruel *Tartars* made Incursions into *Hungaria*, *Moravia*, *Silesia*, sack and burning many Towns, and making no less than 160000 Souls Captives, whom they sold to their barbarous Brethren the *Turks*.

A. D. 1665, there was a great Tempest, accompanied with Thunder, Lightning, and an Earthquake, in divers Places in *England*: At which Time the stately Spire of *Trinity Church* in *Coventry* fell down and demolished a great Part of the Church. The whole Year before a famous Comet was conspicuous to the whole World. The remarkable Events that quickly followed the Earthquake and Comets were, Sir *Robert Holms* destroyed above 150 Sail of *Dutch Ships* at the *Vly* in *Holland*, and burnt the Town of *Bandaris* in the Island of *Schelling*, containing at least 1000 Houses. The lamentable Fire broke out in *London*, which in four Days Space burnt down 13200 Houses, besides 89 Parish-Churches, *St. Paul's*, &c. so that the whole Loss was computed at 9900000 *l.* Sterling. The great Plague in *London*, which swept away 68586 Persons.

A. D. 1668, two Comets made their Appearance, and many Places were this Year sorely afflicted with Earthquakes. In *Asia* there was an horrendous Earthquake, which continued for eighty Days together. The Cities of *Bezbava*, *Angora*, and several other Towns, were totally ruined. The City of *Poli* was destroyed, and 1500 Persons were killed by the Fall of their Houses. *Torqueto* was overthrown in a Moment, and above 6000 Persons lost their Lives, being buried in the Ruins of the City. Also several Places in *Europe*, particularly *Constantinople* and *Adrianople*, but especially *Raguse*, which was in a great part destroyed. Also the Plague broke out in the chief City of the *European Tartary*, and in *Great Poland* and in *Picardy*: It raged in *Douay*, *Ghent*, and other Places.

A Fire

COLEY, 1755.

A Fire in *Moscow* destroyed 30000 Houses and 500 Churches and Chapels. A great Part of the Cities of *Gottenburgh* and *Stetin* were this Year also consumed by Fire. In the Country about *Cadix* there was a great Drought and Dearth of Cattle. The *Turks* invaded *Candia*. The King of *Poland* resigned his Crown, and caused great Troubles in that Kingdom. Great Troubles and Commotions in the Kingdom of *Spain*. Popular Tumults in *Sardinia*. In *Africa*, *Tassileto* made great Stir, subduing the Kingdoms of *Fex* and *Morocco* to his Obedience; so that by his Conquests he at last styled himself, not only the King, but the Emperor of *Barbary*.

And now, in short, to end this Digression, the Consequents or Effects of Earthquakes (the which I only aimed at in this Discourse) are, 1st, Ruin of Buildings, and the Destruction of many People, as you may see more at large in *Languet* and *Eusebius's* Chronologies, *Tacitus* Lib. 2. *Pliny*, *Seneca*, *Possidonius*, *Fromondus*, and the *Philosophical Transactions*, No. 151, 157. 2^{dly}, The Conversion of plain Fields into Mountains, and the Raising of Islands in the Sea; as *Tbia*, *Theresia*, *Delos*, *Rhodes*, and others. 3^{dly}, The Levelling of Mountains, Sinking of Islands and other Grounds, as *Helice* and *Buris*: So likewise of the Earth, which once was, where now is only that deep Pit in the County of *Durham*, commonly called *Hell-Kettles*, in the 24th of *Henry II*. 4^{thly}, The driving away or cutting the Neck of some Isthmus from the Continent: For thus (saith *Seneca*) was *Sicily* divided from *Calabria*, *Spain* from *Africa*, and (if *Vestegan* say true) *Britain* from *France*. 5^{thly}, The Translation of Mountains, Buildings, Trees, &c. from one Place to another: As that did a whole Town in *Lombardy*, in the Reign of *Henry I*. and that other in the 13th of *Queen Elizabeth*, a Hill of 20 Acres, with a Rock under it, at *Kinneston* in *Herefordshire*: The like another, *A. D.* 1583, which removed a Field of three Acres at *Blackmore* in *Dorsetshire*. 6^{thly}, Great Winds and Tempests; manifold Changes and Diversities of the Times; Infection of the Air, and all that breathe in it, especially of such Creatures as are accounted irrational, viz. Oxen, Swine, and Sheep, whose Heads are inclined downwards, for the Vapours that ascend are deadly poisonous, bringing Plagues and Pestilence; as you may read in *Pliny*, Lib. 2. and in *Seneca's Natural Questions*. 7^{thly}, *Cardus* (*Lib. de Rerum*

Variet. Cap. 72.) goes yet a little farther: For saith he; *Terræ Motus magni Bellum aut Pestem nunciant, vel tyrannicam Oppressionem; efficiunt & Segetum Inopiam, & Famem;* i. e. Great Earthquakes do presage a War or Pestilence, or at least some grievous Oppression; they cause a Scarcity of Corn, and a famine. But what Events will attend our late and frequent Earthquakes we hear of, is best known unto him who ruleth in the Army of Heaven, and doth what he will among the Children of Men.

II. *Observations upon the Planetary Influence at the Time of the Sun's apparent Ingress into the Equinoctial and Tropical Signs for this present Year of our Lord 1755.*

Of the SPRING QUARTER.

WHICH this Year commenceth on the 20th Day of *March*, at 5 Min. 30 Sec. past 10 at Night, in the Meridian of *London*; and the Heavens appear at the same Time as in the Figure following:

*A Scheme of the grand Radix of the Year's Revolution,
or Sol's Ingress into Aries. 1755.*

COLEY, 1755.

Guido Bonat. Fol. 489, informs us, That by the Revolution of the Years of the World is known what Accidents shall be in that Year, whether good or ill, as Peace or War, Plenty or Scarcity, Sickneſs or Health, &c. &c. In order therefore to apply this Aphoriſm, let it be obſerved, the Sign *Scorpio* aſcends, and *Mars Almuton* is in Conjunction with *Venus* in *Aquary* in the third Houſe, in Trine to the Moon in the eighth. Theſe and ſome other Poſitions argue and ſhew the great Care and Prudence of our judicious Magiſtrates to reconcile and pacify Matters at Difference; and ſhew the Kingdom to be in a flouriſhing and proſperous Condition, and that there is a good Harmony betwixt his Majeſty and his Nobles. The Orientality of *Mars* and *Venus* promiſe, Plenty of Rain in the Spring, whereby the induſtrious Huſbandman may expect profitable Crops, and the diligent Tradeſman good Returns, with Succeſs and Profit in their Buſineſs and Employments. Though the planetary Poſition at this Vernal Ingreſs promiſes Felicity to *Great Britain*, yet ſome other Nations will find much Infelicity, for all cannot be happy at once, ſince the Glory of one State depends on the Ruin of another: There is a Revolution and Viciffitude of their Greatneſs, and they muſt obey the Swing of that Wheel, not moved by Intelligences, but by the Hand of God, whereby all Eſtates ariſe to their Zenith, or Vertical Point, according to their predeſtinated Periods:

'Tis God that guides the Motion of the Stars,
In Mercy gives us Peace, in Judgment Wars;
Baffles the Politicians grand Deſign,
Their crafty Projects oft doth undermine:
To his Rebuke great Conquerors do bow,
It is his Hand above rules all below.
Let's meekly to his Dictates bend our Will,
Let his ſweet Influence be our Guide ſtill.

III. Of the SUMMER QUARTER.

WHICH begins on *Saturday* the 21ſt Day of *June*, at 12 Min paſt 9 at Night apparent Time; when the 21ſt Degree of *Scorpio* poſſeſſes the Midheaven, and the 16th Degree of *Capricorn* tranſits the Oriental Angle; *Saturn*, Lord thereof, poſſeſſes his own domal Dignities in the
Aſcendant,

Ascendant, being in Opposition to *Mercury*, and in Zodiacal Trine with *Venus* in the fourth: The Moon is in the second Degree of *Sagittary* in the Angle of Honour, lately separated from a Sextile of *Saturn* and Opposition of *Venus*, and applying to a Quartile of *Jupiter*: *Mars* is in the third, the Sun in the sixth, and *Jupiter* in the eighth House. Thus are the Planets posited at this Solstitial Ingress. 'Tis probable the Actions and Proceedings in the World this Summer Quarter may not appear of that Importance as might be expected, for in this Figure we have a cautionable Admonition to beware of a Snake in the Grass: Though most People's Minds seem inclined to Peace and Quietness, yet there are certainly some turbulent, mercurial Spirits at work, to foment and increase Differences, Discord, and Disloyalty.

IV. Of the AUTUMNAL QUARTER.

THIS Quarter commences on the 23d Day of September, at 38 Min. past 10 in the Morning; when the 19th Degree of *Scorpio* is on the Eastern Angle, and the 8th Degree of *Virgo* is the Point culminating; *Jupiter* and *Venus* are in Conjunction, so is the Sun and *Mercury*, and all in the *Medium Caeli*; *Saturn* is in the second House, and *Mars* in the 8th; the Moon is in the 6th, deflecting from the Sextile of *Mars*, and applying to the Trine of *Venus*, *Saturn*, and *Jupiter*. The aforesaid Positions and Configurations being well considered, we may pronounce this Quarter will produce more Gall than Honey: We shall assuredly find this a very busy Quarter, in which many notable Matters will be vigorously transacted. 'Tis the Influence of Heaven which instigates and drives on various Resolutions in People in general; and they are ordained by God Almighty, to shew that Kingdoms and Commonwealths have both Risings and Downfalls in the Affections of Subjects, and that no Engagements hold so long and so firm in the People's Affections, as Justice impartially distributed, and a seasonable Compliance for Redress of People's Grievances. Some Nations in *Europe*, by refusing such seasonable Compliance, are made sensible of the Effects thereof, to their great Sorrow and Confusion. If the *English* wisely improve their Talent, (as there is no Doubt but they will) then will their Fame still be more splendid. The long
and

COLEY, 1755.

and tedious Transit of *Mars* through the Sign *Cancer* will much afflict those Countries under and opposite to the Sun, some of which are *Holland, Scotland, Prussia, Saxony, Macedonia, &c. &c.*

V. Of the WINTER QUARTER.

THE Commencement of this Quarter is on *Monday* the 22d Day of *December*, at 9 Min. past 2 in the Morning; when the last Degree of *Cancer* is on the Meridian, and the 22d Degree of *Libra* is on the Horoscopical Angle; *Venus*, Gubernatrix of the Ascendant, is in Opposition to *Mars*, and applying to the Conjunction of *Saturn* in the third House; the Moon is in the tenth House, applying to the Trine of *Mercury* and Sextile of *Jupiter*; the three superior Planets are all in Cardinal Signs, and near the Angles, applying to the Square and Opposition one of another. This is a very inauspicious Ingress, and shews remarkable Transactions and Events, but they will not be apparent 'till the Year 1756; but a more particular Account may be expected in our next Year's *Anglicus*, wherein the Portents of the Celestial Influx will be more copiously explained.

VI. Of the ECLIPSES.

THERE will be four Eclipses this Year, two of the Sun and two of the Moon, though but one visible, and that is of the Moon: They happen in the following Manner:

The first is of the Sun, invisible, on the 12th Day of *March*, at 10 o'Clock at Night.

The second is a visible Eclipse of the Moon; the Time and Quantity is exhibited in the following Calculation:

D. H. M.

The Beginning, *March* 27 11 15 at Night.

The Middle of the Eclipse, 28 00 31 in the Morning.

The End, at ——— 1 18^a

Digits eclipsed 6 Deg. 58 Min. Duration 2 H. 33 Min.

The third Eclipse is of the Sun, invisible; it happens on the 6th Day of *September*, at eight in the Morning.

The fourth and last Eclipse is of the Moon, on the 20th Day of *September*, at eleven in the Forenoon, so consequently invisible to these Parts.

F I N I S.
